

**TTÜ TARTU KOLLEDŽ
TEADUS- JA ARENDUSTEGEVUSE AASTAARUANNE 2012**

1. Struktuur

**TTÜ Tartu Kolledž, Tartu College of Tallinn University of Technology
Kolledži direktor Lembit Nei**

- Keskkonnakaitse õppetool, Department of Environmental Protection, Mari Ivask
- Maastikuarhitektuuri õppetool, Department of Landscape Architecture, Nele Nutt
- Säästva tehnoloogia õppetool, Department of Sustainable Technology, Aime Ruus
- Üldainete õppetool, Department of Basic Studies, Jaak Sikk

2. Teadus- ja arendustegevuse (edaspidi T&A) iseloomustus

(NB! punktid 2.1- 2.6 täidab struktuuriüksus)

2.1 struktuuriüksuse kootseisu kuuluvate uurimisgruppide

2.1.1 teadustöö kirjeldus

Project: Soil biota studies on human affected areas: models, reactions, food webs (B02, project leader A.Kuu, ETF G9258). The data were collected for describing and modeling the structure and function of soil communities on areas damaged by human activities (opencast mining, contaminated industrial areas in the North East of Estonia). In recultivated mining area field inventory of major soil biota groups was carried out. The field studies for investigation of soil, forest litter and floor layer were carried out to find the relationships between litter quantity and quality, and abundance and diversity of soil invertebrates as well as activities of soil microbial community.

Project: Spatial distribution of soil biota and post-flooding recolonization of floodplain and coastal meadows in Matsalu National Park (ETF G 9145, project leader M.Ivask). The detailed altitude model of Kasari Valley was created to analyze the scope of flooding on Kasari floodplain, based on dataset of survey LIDAR (Light Detection And Ranging), Estonian Land Board 2008, and used MapInfo software Vertical Mapper and Surfer 8. In specific points of floodplain the dynamics of flooded water mass was modeled to analyze the scope of flooding. For this the mapping fieldworks were provided in March (measurements of depth of flooding water). Based on the measurements, the Forecast Model of flooding dynamics on Kasari floodplain was created. Study areas were selected using the altitude- and flooding model by principle that some areas are recolonized more quickly and some are covered by flooding water for very long time. We collected material from the non-flooded meadows adjoining flooded areas and from the refugia located on flooded area but never covered by water (methods: hand sorting of soil, using vermicifice, ekstration by Tullgren' Funnels, pitfall-traps. Soil samples were collected to analyze microbial community and soil chemical and physical parameters. The taxonomical and ecological structure of soil communities and changes in communities after flooding were analyzed.

Assessment of soil biodiversity by abundance and species composition of Collembolas and earthworm communities (Lep12147). Assessment of soil biodiversity (indicators collembolas and earthworms) on fields, where the non-tillage management was applied, and on field with

conventional tillage. The relationships between soil and climatic parameters and soil communities parameters were found.

Studies of composting technologies and their impact on pharmaceuticals (KIK11104). Studies of vermicomposting technology. Composting process of waste materials (sewage sludge, textile, paper, carton, etc) was studied. The composting experiments were carried out to study the activities of soil microbial and earthworm community during decomposition process, composting parameters and quality of compost.

2.1.2 aruandeaastal saadud tähtsamad teadustulemused

1. New knowledge of diversity, systematics and ecology of soil biota in Estonia.
2. Diversity and abundance of soil biota communities on recultivated mining areas depends on quantity and quality of plant litter and is the main factor in formation of humus layer.
3. Meadows around flooded areas in Matsalu are characterized by high abundance and diversity of soil invertebrates and can function as refugia in period of flooding.
4. Non-tillage technology when compared with conventional technology is not preferable for soil biota: minimized mechanical disturbance was counterbalanced by higher content of pesticides in plant litter and by lower aeration of soil.
5. Elaboration of composting technologies for several waste materials.

2.2 Uurimisgrupi kuni 5 olulisemat publikatsiooni läinud aastal.

2.3 Loetelu struktuuriüksuse töötajate rahvusvahelistest tunnustustest.

2.4 Loetelu struktuuriüksuse töötajatest, kes on välisakadeemiate või muude oluliste T&A-ga seotud välisorganisatsionide liikmed.

Mari Ivask - Maailma looduskaitseorganisatsiooni IUCN juures asuva Euroopa Säästva Kasutamise Grupi (European Sustainable Use Group by IUNC) liige, juhtkomitee liige

2.5 Aruandeaasta tähtsamad T&A finantseerimise allikad.

2.6 Soovi korral lisada aruandeaastal saadud T&A-ga seotud tunnustusi (va punktis 2.3 toodud tunnustused), ülevaate teaduskorralduslikust tegevusest, teadlasmobiilsusest ning anda hinnang oma teadustulemustele.

- 2012. aastal ilmunud artikli valimine portaali *Earth Emphasis* olulisemate publikatsioonide (key articles) hulka
- Jane Peda – 2. Koht Talveakadeemia üliõpilastööde konkursil
- Annely Kuu – Tartu Kolledži kontaktisik *European Centre of Nature Conservation* (ECNC) juures
- Teadlasmobiilsus: M.Ivask ja A.Kuu Glasgow's (Inglismaa) 27.08.-2.09.2012

2.7 Teadus- ja arendustegevuse teemade ja projektide nimetused (*Eesti Teadusinfoüsteemi, edaspidi ETIS, andmetel*)

- Haridus- ja Teadusministeerium
- sihtfinantseeritavad teemad:

- baasfinantseerimise toetusfondist rahastatud projektid (sh TTÜ tippkeskused):
B02, Mullaelustiku uuringud inimese poolt mõjutatud piirkondades: mudelid, reageeringud, toduahelad, Annely Kuu (2011 – 2013)
- riiklikud programmid:
 - Teiste ministeeriumide poolt rahastatavad riiklikud programmid:
 - Uuri ja professori rahastamine:
 - SA Eesti Teadusfond/Eesti Teadusagentuur
- grandid:
 - ühisgrandid välisriigiga:
 - järeldoktorite grandid (SA ETF ja Mobilitas):

ETF9145, Mullaelustiku ruumiline jaotus ja koosluste üleujutusejärgne taastumine Matsalu Rahvuspargi lamm- ja rannaniitadel, Ivask Mari (2012 – 2015)

ETF9258, Mesofauna mõju läbi lagunemisprotsesside mulla kvaliteedile, nende olulisus toduahelas ja suktsessioon inimese poolt mõjutatud piirkondades, Kuu Annely (2012 – 2015)

ETF9362, Georges Frédéric Parrot ja Thomas Jeffersoni poolt rakendatud valgustusajastu haridusideed ning nende tõlgendusvõimalused 21. sajandi hariduses, Tohvri Epi (2012 – 2015)
- tippteatlase grandid (Mobilitas):
 - Ettevõtluse Arendamise SA
- eeluuringud:
- arendustoetused:
 - SA Archimedeseega sõlmitud lepingud
- infrastruktur (nn „mini-infra“, „asutuse infra“):
 - Eesti tippkeskused:
 - riiklikud programmid:
 - muud T&A lepingud:
 - SA Keskkonnainvesteeringute Keskusega sõlmitud lepingud:
KIK11104, Kompostimistehnoloogiate mõju ravimijääkide sisaldusele reoveesestest valmistatud kompostis, Nei Lembit (1.08.2011 - 30.06.2012)
 - Siseriiklikud lepingud:
Lep11025, Isotermkarastuse ja silelõike stantsimisega seotud materjali analüüs, Peetsalu Priidu (1.04.2011 - 31.12.2016)
 - EL Raamprogrammi projektit:
 - Välisriiklikud lepingud:
VIE480, EmPower, Soon Ants (1.07.2010 - 30.06.2013)
 - VIR516, Energiatõhus ja ökoloogiline majapidamine, Ruus Aime (1.04.2011 - 31.12.2013)

2.8 Struktuuriüksuse töötajate poolt avaldatud eelretsenseeritavad teaduspublikatsioonid (*ETIS klassifikaatori alusel 1.1, 1.2, 1.3, 2.1, 2.2, 3.1, 3.2, 3.3, 4.1 ja 5.1*).
