

MAJANDUSTEADUSKONNA RAHVAMAJANDUSE INSTITUUDI TEADUS- JA ARENDUSTEGEVUSE AASTAARUANNE 2011

1. Instituudi struktuur

Instituudi direktor Kaie Kerem

- Majandusmatemaatika õppetool, Chair of Business Mathematics, Ants Aasma
- Majandusteooria õppetool, Chair of Theoretical Economics, Kaie Kerem
- Rahanduse ja panganduse õppetool, Chair of Finance and Banking, Enn Listra
- Statistika ja ökonomeetria õppetool, Chair of Statistics and Econometrics, Ako Sauga

2. Instituudi teadus- jaarendustegevuse (edaspidi T&A) iseloomustus

(NB! punktid 2.1- 2.6 täidab struktuuriüksus)

2.1

Majandusmatemaatika õppetool

2.1.1. teadustöö kirjeldus (inglise keeles);

The topic of the Chair of Business Mathematics is: linear, dynamic and stochastic optimization problems in economics. Problems under investigations: the structure of consumption in households of Baltic States; the impact of fiscal policy to decision-making of households; matrix transforms of summability and absolute summability fields of matrix methods, the acceleration of the rate of convergence of convergent processes by matrix methods; the solving linear programming problems using highly developed least squares techniques, finding the initial solution for the simplex method; investigation of large deflections of the beams under follower load; study the Numerov method for solution nonlinear boundary value problems.

2.1.2. aruandeaastal saadud tähtsamad teadustulemused (inglise keeles).

Using well-known Campbell-Mankiw's model, the share of „rule-of-thumb“ consumers in Baltic states, are estimated and compared with similar data's from the other countries; using inverse-transformation method some classes of factorable matrices, transforming the summability domain of normal matrix A into the summability domain of another matrix B, are characterized. As an application, the conclusions for the special cases, where A, or A and B both are Cesaro matrices, are derived; Ill-conditioned and degenerate linear programming problems are transformed to the system of linear inequalities and solved as non-negative least squares (NNLS) problems; using coordinate shifting in dual the dual problem, the initial solution for the prime-dual simplex method is found by the NNLS problem; the large deflections problem for curved cantilever subjected to follower force is solved numerically by using direct Numerov's method, equilibrium configurations of the curved cantilever under normal or tangential tip-concentrated follower force are presented.

2.2. Majandusmatemaatika õppetooli olulisem publikatsioon:

- Aasma, A. (2011). Factorable matrix transforms of summability domains of Cesaro matrices. International Journal of Contemporary Mathematical Sciences, 6(44), 2201 - 2206.
Majandusteooria õppetool

Majandusteooria õppetool

2.1.1. teadustöö kirjeldus (inglise keeles);

The members of Chair of Theoretical Economics participate in the research group „The analysis of the development perspectives of Estonia as a small open economy“. The group's research topics are focused on the social issues of Estonian economy and its institutions. For steady growth exclusive economic institutions (that do not allow the majority of people to use their skills and talents as they see fit, and involve selective rules and criteria) must be substituted by inclusive ones. These institutions regulate also access to equal educational opportunities, labour market, banking sector and also foreign sector.

2.1.2. aruandaastal saadud tähtsamad teadustulemused (inglise keeles).

We confirm that Estonian social model can be still classified under 'post-soviet' type, characterised by relatively high commodification and low social protection, also we indicate that under the recent crisis difficult choice – to conform either liberal (Anglo-Saxon) or Nordic model – must be implemented. What concerns foreign sector analysis, intra-industry trade (IIT) dynamics for Estonia, Latvia, and Lithuania in 1999-2007 shows that shares of IIT have increased within the period, with vertical IIT dominating. Analysis of Estonian banking sector shows that the measurement of credit risk determinants by banks has not sufficiently effective. Among factor endowment variables, we find difference in human capital to be significant in explaining IIT. The results are published in 18 papers and 12 from these are under ETIS categories 1.1., 1.2., 3.1.

2.2. Majandusteooria õppetooli olulisemad publikatsioonid:

- Pöder, K.; Kerem, K. (2011). 'Social Model' in a European Comparison; Convergence or Divergence. *Eastern European Economics*, 49(05), 55 - 74.
- Pöder, K. (2011). Institutsioonide ajalugu ja majandusareng: kuidas majandusteooria, politoloogia ja ajalugu kokku saavad . *Ajalooline Ajakiri*, 3/4(134/137), 3 - 22.
- Fainštein, G.; Netšunajev, A. (2011). Intra-Industry Trade Development in the Baltic States. *Emerging Markets Finance and Trade*, 47(04S3), 95 -110.

Rahanduse ja panganduse õppetool

2.1.1. teadustöö kirjeldus (inglise keeles);

The members of the chair of Finance and Banking participate in the research group „Problems of Financial Environment of Entrepreneurship“. The group's research topics are focused on the corporate finance issues of capital structure, on the topics of the information availability and its influence, behavioural finance and on the issues of economic developments in Eastern European countries. Recently, the group's work has been moved towards the problems of economic cycles in Central and Eastern European Countries. The new research programme is connected with financial sector structure, development and procyclical behaviour of financial institutions.

2.1.2. aruandaastal saadud tähtsamad teadustulemused (inglise keeles).

Main results of the research are under the topics of unemployment persistence, capital structure in domestic and multinational companies, economic reforms in post-communist countries, and public

announcements quality and liquidity and investor behaviour on stock Exchange. The results are published in 14 papers and articles under categories 1.1., 1.2., and 3.1.

2.2. Rahanduse ja panganduse õppetooli olulisemad publikatsioonid:

- Cuestas, J.-C.; Gil-Alana, L.A.; Staehr, K. (2011). A further investigation of unemployment persistence in European transition economies. *Journal of Comparative Economics*, 39(4), 514 - 532.
- Avarmaa, M.; Hazak, A.; Männasoo, K. (2011). Capital structure formation in multinational and local companies in the Baltic States. *Baltic Journal of Economics*, 11(1), 125 - 145.
- Staehr, K. (2011). Democratic and market-economic reforms in the post-communist countries. The impact of enlargement of the European Union. *Eastern European Economics*, 49(05), 5 - 28.
- Laidroo, L. (2011). Market Liquidity and Public Announcements' Disclosure Quality on Tallinn, Riga, and Vilnius Stock Exchanges. *Emerging Markets Finance and Trade*, 47(4), 54 - 79.
- Talpsepp, T. (2011). Reverse Disposition Effect of Foreign Investors. *Journal of Behavioral Finance*, 12(4), 183 - 200.

Statistika ja ökonomeetria õppetool

2.1.1. teadustöö kirjeldus (inglise keeles);

The members of the chair of Chair of Statistics and Econometrics participate in the research group "Dynamics of the Financial Sector of Estonian Economy and Affecting Factors". The first topic of the Chair of Statistics and Econometrics is stochastic processes and their applications to interdisciplinary spheres. Special attention will be paid to the application of noise-induced phenomena. The results expected would be important in preserving the stability of different dynamic systems in fluctuating environments. The second topic is economic growth and financial system development in consolidating and globalizing environment. The main goal is to analyse empirically the relationship between financial development and economic growth in the Baltic countries. The main hypothesis is that the well-functioning financial sector accelerates economic growth in the selected transition countries.

2.1.2. aruandaastal saadud tähtsamad teadustulemused (inglise keeles).

The temporal behaviour of the mean-square displacement and the velocity autocorrelation function of a particle subjected to a periodic force in a harmonic potential well are investigated for viscoelastic media using the generalized Langevin equation. The interaction with fluctuations of environmental parameters is modelled by a multiplicative white noise, by an internal Mittag-Leffler noise with a finite memory time, and by an additive external noise. It is established that additive external and internal noises cause qualitatively different dependences of the autocorrelation functions on the external forcing and also on the time lag. The influence of the memory time of the internal noise on the dynamics of the system is also discussed.

Using the first-purchase Bass diffusion model the consumer behaviour in the Baltic States is investigated. The coefficients of innovation and imitation are estimated and also the similarities and differences between the Baltic States and other European countries are examined. The estimation results can be used to forecast the diffusion pattern for analogous products and are useful to firms who operate in the Baltic market or who have such plans.

The relationship between financial development and economic growth in Baltic countries is analysed. Results from the fixed effect estimates tend to suggest that that financial development, as measured by six independent proxies, has not been strongly contributing to the output level of the countries in the sample. The positive link is confirmed only for stock market capitalization and ratio of broad money to GDP, but minor effect on economic growth.

The results are published in 4 papers and articles under categories 1.1., 1.2., and 3.1.

2.2. Statistika ja ökonomeetria õppetooli olulisemad publikatsioonid:

- Mankin, R.; Laas, K.; Sauga, A. (2011). Generalized Langevin equation with multiplicative noise: Temporal behavior of the autocorrelation functions. *Physical Review E*, 83(6), 061131-1 - 10.

2.3 Loetelu struktuuriüksuse töötajate rahvusvahelistest tunnustustest.

2.4 Loetelu struktuuriüksuse töötajatest, kes on välisakadeemiate või muude oluliste T&A-ga seotud välisorganisatsioonide liikmed.

Prof. K. Kerem on COPE Council Directors (Congress of Political Economists) liige.

Prof. E. Listra on BMDA (Baltic Management Development Association) juhatuse liige, EIBA (European International Business Academy) juhatuse liige ja kuulub ajakirja Technological and Economic Development of Economy (ETIS 1.1) toimetuskolleegiumi.

Prof. A. Sauga on rahvusvahelise multidistsiplinaarse ajakirja Physical Review E retsent.

Prof. B. Shvartsman on ajakirja International Journal Advances in Theoretical and Applied Mechanics, Hikari Ltd. toimetuse liige.

Prof. K. Staehr on liikmeeks: European Economic Association (EEA);

European Association for Comparative Economic Studies (EACES);

European Association for Labour Economists (EALE);

International Network for Economic Research (INFER);

Nationaløkonomisk forening (Danish Economic Association);

Society for the Study of Emerging Markets.

Dots. A.Aasma on referatiivajakirja Mathematical Reviews referent.

Dots. Tatjana Põlajeva on Baltic University Program programmi koordinaator ja ajakirja Business, Management and Education (Vilnius Gediminas Technical University) toimetaja;

Baltic University Programme (BUP) koordinaator Eestis;

Baltic University Programme (BUP) nõukogu liige, Uppsala University;

Congress of Political Economists (COPE) direktorite nõukogu liige;

Global Business and Technology Association liige.

Vanemteadur Aaro Hazak on teadusajakirja Research in Economics and Business: Central and Eastern Europe juhtivtoimetaja ning Emerging Markets Finance and Trade eriväljaande külalistoimetaja ning on vanemliige (Senior Member) International Economics & Development Research Centre (Hong Kong).

Vanemteadur K. Põder on ISNIE liige (International School of New Institutional Economics).

Lektor Kaja Lutsoja on projekti LLP, Multilateral Projects Development and Implementation of Common Bachelor Programme in the European Context TTÜ poolne koordinaator.

2.5 Aruandeaasta tähtsamad T&A finantseerimise allikad.

2.6 Soovi korral lisada aruandeaastal saadud T&A-ga seotud tunnustusi (va punktis 2.3 toodud tunnustused), ülevaate teaduskorralduslikust tegevusest, teadlasmobiilsusest ning anda hinnang oma teadustulemustele.

2.7 Instituudi teadus- ja arendustegevuse teemade ja projektide nimetused (*Eesti Teadusinfostiemi, edaspidi ETIS, andmetel*)

- Haridus- ja Teadusministeerium
sihtfinantseeritavad teemad:

- SF0132723s06 “Mittelineaarsed stohhastilised protsessid nano- ja ökosüsteemides: teoria ning rakendused materjaliteadustes ja ökoloogias”, A. Sauga (põhitäitja)

baasfinantseerimise toetusfondist rahastatud projektid (sh TTÜ tippkeskused):

- B617A, Majandustsüklid Kesk- ja Ida-Euroopa üleminekumajandustes, K. Staehr

riiklikud programmid:

- Teiste ministeeriumide poolt rahastatavad riiklikud programmid:
- Uuri ja professori rahastamine:
- SA Eesti Teadusfond

grandid:

- ETF8796, Ettevõtete jätkusuutlikkus majandustsükliliste tegurite ja seadusandlike regulatsioonide mõju tingimustes, A. Hazak
- ETF8627, Aproksimeerimisega seotud funktsiooni- ja jadaruumid ning nende rakendused, A. Aasma
- ETF8760 (TTÜ Energeetika teaduskond), Soojuselektrijaama vektoroptimeerimine arvestades info mittetäielikkust, E. Übi (põhitäitja)
- ETF7319 (Tallinna Ülikooli matemaatika ja loodusteaduste instituut), Värvilise müra konstruktiiivne roll populatsioonide mittelineaarsete mudelite dünaamikas, A. Sauga (põhitäitja)

ühisgrandid välisriigiga:

järeldoktorite grandid (SA ETF ja Mobilitas):

tippteatlase grandid (Mobilitas):

- Ettevõtluse Arendamise SA
eeluringud:
arendustoetused:

- SA Archimedesega sõlmitud lepingud

- riigihanke (hankija SA Archimedes) Loodus-, ja täppisteaduste ning tehnoloogia (LTT) valdkonna gümnaasiumi valikkursuste õppekomplekti osa 8: „Majandusmatemaatika elemendid“ koostamine; A. Aasma, A. Sauga, E. Übi, A. Org
- litsentsileping nr 27-5/51 R (SA Archimedesega) Rakendusmatemaatika õpikuväljaandmiseks; E. Übi, K. Keres

infrastruktuur (nn „mini-infra“, „asutuse infra“):

Eesti tippkeskused:

riiklikud programmid:

muud T&A lepingud:

- SA Keskkonnainvesteeringute Keskusega sõlmitud lepingud:
- Siseriiklikud lepingud:
 - Tippkeskuse projekt TK114 “Mesosüsteemide teoria ja rakendused”; A. Sauga
- EL Raamprogrammi projektid:
- Välisriiklikud lepingud:
 - Uurimisprojekt „Estonian-Hungarian joint research project (under the agreement on scientific cooperation between the Estonian Academy of Sciences and the Hungarian Academy of Sciences 2010-2012)“; G. Fainštein

2.8 Struktuuriüksuse töötajate poolt avaldatud sihtfinantseeritava teadusteema taotlemisel arvestatavad eelretsenseeritavad teaduspublikatsioonid (*ETIS klassifikaatori alusel 1.1, 1.2, 1.3, 2.1, 2.2, 3.1, 3.2, 3.3, 4.1 ja 5.1*).
